

SIGHT RE-CONSTRUCTIONS.

[First Prize] Idensitat 07. International Competition. //

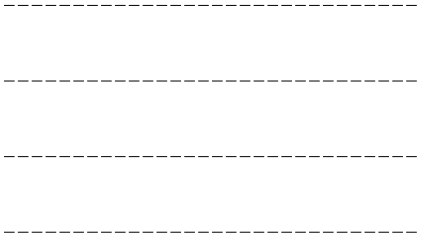

Size: City // Type: Urban Action //

Structure: Sight // Project description:

This reflexion's starting point arises from the question of how to represent the city changing and complex reality, moving away from systematic and unidirectional interpretations of the city. In this project, the city description is generated through the persons' glance. To take part in the city's construction means to move into action. //
